

# News Release

EMBARGOED UNTIL RELEASE AT 10:00 a.m. EDT, Wednesday, July 31, 2024

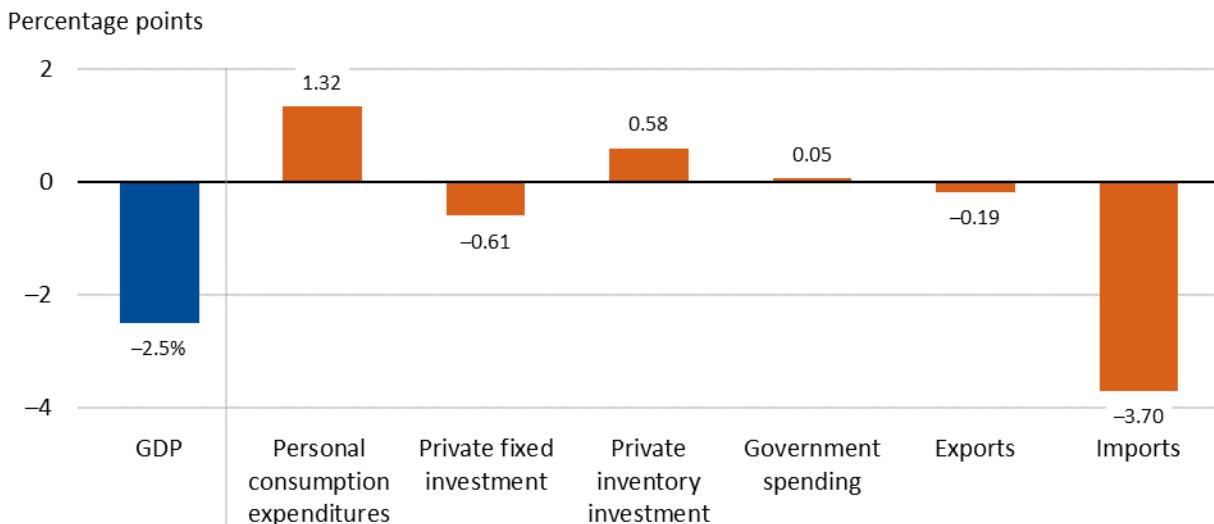

BEA 24-35

Technical: Amy Filipek 301-278-9023 [Territories@bea.gov](mailto:Territories@bea.gov)  
Media: Connie O'Connell 301-278-9003 [Connie.OConnell@bea.gov](mailto:Connie.OConnell@bea.gov)

## Gross Domestic Product for Puerto Rico, 2022

**Real gross domestic product (GDP)** for Puerto Rico decreased 2.5 percent in 2022 after increasing 4.1 percent in 2021 (table 1.3), according to statistics released today by the U.S. Bureau of Economic Analysis. The decrease in real GDP in 2022 reflected an increase in imports—which are a subtraction item in the calculation of GDP—as well as decreases in private fixed investment and exports (chart 1). Personal consumption expenditures, private inventory investment, and government spending increased.

**Chart 1. Puerto Rico: Contributions to the Percent Change in Real GDP, 2022**

Note. The chart shows the percent change of total real GDP and the contributions (in percentage points) of each major component to that change. For example, exports accounted for -0.19 percentage point of the 2.5 percent decrease in real GDP in 2022. Imports are a subtraction item; thus, an increase in imports results in a negative contribution to GDP.

GDP Gross domestic product  
U.S. Bureau of Economic Analysis

**Real imports** increased 7.3 percent (table 3.3), reflecting an increase in imports of goods. The increase was led by pharmaceuticals and organic chemicals, which increased 21.7 percent. This growth in imports of pharmaceuticals and organic chemicals, which are primary inputs of the pharmaceutical manufacturing industry, outpaced the growth in that industry's exports.

**Real private fixed investment (PFI)** decreased 4.6 percent (table 4.2.3). Investment in intellectual property products decreased 24.7 percent, while investment spending on equipment and structures increased 4.3 percent and 2.1 percent, respectively.

- For Puerto Rico, investment in intellectual property products largely consists of research and development spending by computer service providers and other businesses.
- The leading contributor to the increase in investment in equipment was information processing equipment (table 4.2.4), which includes purchases of medical instruments by businesses.
- The leading contributor to the increase in structures was nonresidential structures, reflecting ongoing projects to expand renewable energy generation.

**Real exports** decreased 0.3 percent (table 3.3), reflecting a decrease in exports of services that was partly offset by an increase in exports of goods. Exports of services decreased 14.6 percent, while exports of goods increased 2.9 percent.

- The leading contributor to the decrease in exports of services was “other services” (table 3.4), which includes computer services. This decrease was partly offset by exports of travel services, which includes purchases of goods and services by tourists and other nonresidents in Puerto Rico.
- The leading contributor to the increase in exports of goods was pharmaceuticals and organic chemicals, which increased 2.6 percent (table 3.3).

**Real personal consumption expenditures (PCE)** increased 2.2 percent (table 2.3). PCE services increased 5.5 percent, while spending on PCE goods decreased 0.7 percent.

- The increase in PCE services reflected widespread growth. The leading contributor to the increase was “other services” (table 2.4), which includes recreation services, such as live entertainment.
- The leading contributor to the decrease in PCE goods was motor vehicles and parts. According to statistics published by the Economic Development Bank for Puerto Rico, unit sales of motor vehicles decreased 4.3 percent in 2022 after increasing 35.9 percent in 2021.

**Real private inventory investment** increased (table 1.2). The largest contributor to the increase was the manufacturing sector.

**Real government spending** increased 0.4 percent (table 1.3), reflecting increases in investment spending by federal, central, and municipal governments (table 4.1.3). The increases in government investment spending reflected growth in disbursements of federal funds for disaster recovery activities associated with Hurricanes Irma and Maria in 2017, earthquakes in 2019 and 2020, and Hurricane Fiona in 2022.

## Updates to Puerto Rico GDP

Estimates of GDP and its components for 2018–2021 that were released on July 31, 2023, have been revised to incorporate updates to source data including the following:

- Newly available financial data for companies from the Puerto Rico Department of State online Registry of Corporations and Entities and from the Puerto Rico Department of Economic Development and Commerce (DDEC).
- Newly available and updated tabulations of tax returns for taxable corporate businesses and proprietors from the Puerto Rico Department of Treasury.
- Updated information from the Puerto Rico Planning Board for business inventories and sales, balance of payments, and construction spending.
- Newly available audited government financial statements and unaudited operating and budget statements for the Commonwealth government, its component units, and municipal governments.
- Newly available *Informe sobre la encuesta de inversión en investigación y desarrollo en Puerto Rico 2022 (Report on the Survey of Investment in Research and Development in Puerto Rico in 2022)* from DDEC.
- Updated tabulations of declared sales by industry from the monthly Sales and Use Tax Return from the Puerto Rico Department of Treasury.
- Updated data on shipments from the joint U.S. Census Bureau and BEA *International Trade in Goods and Services* (FT900) report.
- Newly available *Capital Cost and Performance Characteristics for Utility-Scale Electric Power Generating Technologies* report from the U.S. Energy Information Administration.

The revised estimates exhibit a pattern of inflation-adjusted GDP growth similar to the previously published estimates (table 1).

**Table 1. Puerto Rico: Revisions to Real GDP**

	Current release				Revision from prior release			
	2018	2019	2020	2021	2018	2019	2020	2021
<b>Real GDP</b>								
Millions of chained (2012) dollars	99,001	99,452	93,152	96,986	-35	28	-113	-36
Percent change from preceding period	-3.0	0.5	-6.3	4.1	-0.1	0.1	-0.1	0.1

Note. The revision from prior release is calculated as the value reported in the current release minus the value reported in the prior release.

GDP Gross domestic product

U.S. Bureau of Economic Analysis

Due to lags in the availability of key data sources used in the estimation of Puerto Rico GDP, the statistics presented today for 2022 are preliminary estimates. For example, currently available data sources for central government spending and private inventory investment do not cover all of calendar year 2022. As additional source data become available, BEA will incorporate the information and will release updated estimates once a year.

For more information on the data sources underlying these estimates, see [Summary of Methodologies: Puerto Rico Gross Domestic Product](#).

### Acknowledgments

Because Puerto Rico is not included in most of the major surveys used by BEA to estimate U.S. GDP, the support and assistance provided by the government of Puerto Rico has been critical to the successful production of these estimates. BEA appreciates the information provided by numerous organizations and individuals in Puerto Rico including (in alphabetical order) the following:

- Discover Puerto Rico (Puerto Rico's destination marketing organization)
- Economic Development Bank for Puerto Rico, Office of Economic Studies
- Office of the Commissioner of Insurance of Puerto Rico
- Puerto Rico Department of Economic Development and Commerce
- Puerto Rico Department of Labor and Human Resources
- Puerto Rico Department of Treasury
- Puerto Rico Electric Power Authority
- Puerto Rico Industrial Development Company
- Puerto Rico Institute of Statistics
- Puerto Rico Planning Board
- Puerto Rico Ports Authority
- Puerto Rico Tourism Company

Next release: Summer 2025  
Gross Domestic Product for Puerto Rico, 2023

## Additional Information

### Resources

- Stay informed about BEA developments by reading [The BEA Wire](#), signing up for BEA's [email subscription service](#), or following [@BEA\\_News](#) on X, formerly known as Twitter.
- Historical time series for gross domestic product for the U.S. territories can be accessed on [BEA's website](#).
- For more on BEA statistics, see our online journal, the [Survey of Current Business](#).
- For upcoming economic indicators, see BEA's [news release schedule](#).

### Definitions

**Gross domestic product (GDP)** is the value of the goods and services produced by the Puerto Rico economy less the value of the goods and services used up in production. GDP is also equal to the sum of personal consumption expenditures, private fixed investment, change in private inventories, net exports of goods and services, and government consumption expenditures and gross investment.

**Personal consumption expenditures** measures the goods and services purchased by "persons"—that is, by households and by nonprofit institutions serving households—who are resident in Puerto Rico.

**Private fixed investment** measures spending by private businesses, nonprofit institutions, and households on fixed assets in the Puerto Rico economy. Fixed assets consist of structures, equipment, and intellectual property products that are used in the production of goods and services.

**Change in private inventories**, or "private inventory investment," is a measure of the value of the change in the physical volume of the inventories—additions less withdrawals—that businesses maintain to support their production and distribution activities.

**Net exports of goods and services** is the difference between exports of goods and services and imports of goods and services. Exports measures the portion of total Puerto Rico production of goods and services that is provided to the rest of the world. Imports measures the portion of total Puerto Rico expenditures that is accounted for by goods and services provided by the rest of the world.

**Government consumption expenditures and gross investment**, or "government spending," measures the portion of GDP that is accounted for by the government sector. Government consumption expenditures consists of spending by government to produce and provide services to the public. Gross investment consists of spending by government for fixed assets that directly benefit the public or that assist government agencies in their production activities.

**Current-dollar estimates** are valued in the prices of the period when the transactions occurred—that is, at "market value" (also referred to as "nominal estimates" or "current-price estimates").

**Real values** are inflation-adjusted estimates—that is, estimates that exclude the effects of price changes.

### Statistical conventions

**Quantities (or "real" volume measures) and prices** are expressed as index numbers with a specified reference year equal to 100 (currently 2012). Quantity and price indexes are calculated using a Fisher chain-weighted formula that incorporates weights from two adjacent years. "Real" dollar series are calculated by multiplying the quantity index by the current-dollar value in the reference year and then dividing by 100.

**Chained-dollar values** are not additive, because the relative weights for a given period differ from those of the reference year.

p Preliminary / p Preliminares

1. Midyear population. BEA produced intercensal population statistics for 2012 to 2019 that are tied to the Census Bureau decennial counts for 2010 and 2020. BEA developed intercensal population statistics because these data were not published when Census released Puerto Rico population estimates for 2020 to 2022, which are based on the 2020 decennial counts. BEA used the Census Bureau Das Gupta method (see <https://www2.census.gov/programs-surveys/popest/technical-documentation/methodology/intercensal/2000-2010-intercensal-estimates-methodology.pdf>), modified to account for an extra leap year day, to produce the intercensal population statistics that will be used by BEA until Census releases its official intercensal population data. Population statistics for 2020 to 2022 use Annual Estimates of the Resident Population for the United States, Regions, States, the District of Columbia, and Puerto Rico: April 1, 2020 to July 1, 2023, NST-EST2023-POP (U.S. Census Bureau, Population Division). / 1. Población de mitad de año. El BEA produjo cifras de población intercensal desde 2012 hasta 2019 que están vinculadas a los conteos decenales del Negociado del Censo para 2010 y 2020. El BEA desarrolló estadísticas de población intercensal porque estos datos no estaban disponibles cuando el Censo publicó los datos de población de Puerto Rico para los años de 2020 a 2022, que se basan en el conteo decenal de 2020. El BEA utilizó una modificación del método de Das Gupta del Negociado del Censo (véase <https://www2.census.gov/programs-surveys/popest/technical-documentation/methodology/intercensal/2000-2010-intercensal-estimates-methodology.pdf>), para tener en cuenta el día adicional de cada año bisiesto, y poder producir las cifras de población intercensal que se utilizarán hasta que el Censo publique sus datos oficiales de población intercensal. Los estimados de población de 2020 a 2022 utilizan estimados anuales de la población residente para los Estados Unidos, las regiones, los estados, el Distrito de Columbia y Puerto Rico: desde el 1 de abril de 2020 hasta el 1 de julio de 2023 NST-EST2023-POP (Negociado del Censo de EE. UU., División de Población).

2. Per capita real PCE statistics are calculated by dividing real PCE by midyear population. BEA produced intercensal annual Puerto Rico population statistics for 2012 to 2019 that are tied to the Census Bureau decennial counts for 2010 and 2020. Population statistics for 2020 to 2022 use Annual Estimates of the Resident Population for the United States, Regions, States, the District of Columbia, and Puerto Rico: April 1, 2020 to July 1, 2023, NST-EST2023-POP (U.S. Census Bureau, Population Division). / 2. Las estadísticas del PCE real per cápita se calculan dividiendo el PCE real por la población de mitad de año. El BEA produjo estadísticas intercensales anuales de población de Puerto Rico para los años de 2012 a 2019 que están vinculadas a los conteos decenales del Negociado del Censo para 2010 y 2020. Las estadísticas de población de 2020 a 2022 utilizan estimados anuales de la población residente para los Estados Unidos, las regiones, los estados, el Distrito de Columbia y Puerto Rico: del 1 de abril de 2020 al 1 de julio de 2023, NST-EST2023-POP (Negociado del Censo de EE. UU., División de Población).
