Part I — Identification of Foreign Affiliate — Continued

Section A — Direct Ownership in this Foreign Affiliate

• Equity interest is the direct ownership in the total equity (voting and nonvoting) of the affiliate.
Examples of nonvoting equity include nonvoting stock and a limited partner's interest in a partnership.

•	Voting interest is the direct ownership in just the voting equity of the affiliate.
	Examples of voting equity include voting stock and a general partner's interest in
	a partnership. Thus, a U.S. Reporter could have a 100 percent direct voting interest
	in an affiliate but own less than 100 percent of the affiliate's total equity.

Report the number of employees on the payroll at the end of FY 2024 including part-time employees, but excluding temporary and contract employees not included on your payroll records. If the number of employees at the end of FY 2024 (or when the count was taken) was unusually high or low due to temporary factors (e.g., a strike), enter the number of employees that reflects normal operations. If the number of employees fluctuates widely during the year due to seasonal business variations, report the average number of employees on the payroll during FY 2024. Base

Part IV — U.S. Exports To and U.S. Imports From Foreign Affiliate

IMPORTANT NOTES

Report U.S. exports of goods to and U.S. imports of goods from the foreign affiliate in FY 2024. Report all goods that physically left or entered the U.S. customs area. Report data on a "shipped" basis, i.e., on the basis of when and to (or by) whom the goods were shipped. This is the same basis as official U.S. trade statistics to which these data will be compared. Do **not** record a U.S. import or export if the goods did not physically enter or leave (i.e., were not physically shipped to or from) the United States, even if they were charged to the foreign affiliate by, or charged by the foreign affiliate to, a U.S. person

Foreign affiliates normally keep their accounting records on a "charged" basis, i.e., on the basis of when and to (or by) whom the goods were charged. The "charged" basis may be used if there is no material difference between it and the "shipped" basis. If there is a material difference, the "shipped" basis must be used or adjustments made to the data on a "charged" basis to approximate a "shipped" basis. The data should **INCLUDE** goods only; they should **EXCLUDE** services.

Capital goods — **INCLUDE** capital goods but **EXCLUDE** the value of ships, planes, railroad rolling stock, and trucks that were temporarily outside the United States transporting people or goods.

Consigned goods — **INCLUDE** consigned goods in the trade figures when shipped or received, even though they are not normally recorded as sales or purchases, or entered into intercompany accounts when initially consigned.

In-transit goods — EXCLUDE from exports and imports the value of goods that are in-transit. In-transit goods are goods that are not processed or consumed by residents in the intermediate country(ies) through which they transit; the in-transit goods enter that country(ies) only because that country(ies) is along the shipping lines between the exporting and importing countries. In-transit imports are goods en route from one foreign country to another via the United States (such as from Canada to Mexico via the United States), and in-transit exports are goods en route from one part of the United States to another part via a foreign country (such as from Alaska to Washington State via Canada).

Packaged general use computer software — INCLUDE exports and imports of packaged general use computer software. Value such exports and imports at the full transaction value, i.e., the market value of the media on which the software is recorded and the value of the information contained on the media. **EXCLUDE** exports and imports of customized software designed to meet the needs of a specific user. This type of software is considered a service and should not be included as trade in goods. **EXCLUDE** negotiated fees for software that is to be used on networks.

Natural gas, electricity, and water — Report ONLY the product value of natural gas, electricity, and water that you produce or sell at wholesale as exports and imports of goods. DO NOT report the service value (transmission and distribution).
